ABOUT ME

Cybersecurity-focused MCA student with hands-on experience in SIEM monitoring, incident response, threat detection, and secure application development. Skilled in log analysis, network monitoring, and vulnerability assessment using tools such as Wazuh, Wireshark, and Nmap. Strong analytical and problem-solving abilities with a passion for building secure and reliable systems.

WORK EXPERIENCE

SOC Analyst Intern

Feb 2025 – Mar 2026

CyberTech Shield

- Monitored and analyzed security alerts and logs using Wazuh SIEM across endpoints, servers, and network devices.
- Investigated suspicious activities, failed login attempts, and potential security threats through log correlation and event analysis.
- Performed incident triage, escalation, and documentation following SOC and incident response procedures.
- Worked with tools such as Wireshark, Nmap, and Linux utilities for network monitoring and security analysis.
- Configured alert rules, dashboards, and monitoring policies to improve threat detection and visibility.
- Gained practical experience in SIEM operations, vulnerability assessment, and cybersecurity frameworks including MITRE ATT&CK.

Mobile App Intern

Nov 2023 – Mar 2024

Arth Consultancy Services

- Developed and maintained mobile and web-based applications with secure authentication and database integration.
- Built a File & Content Management System with file handling, access control, and user management features.
- Developed a Food Ordering System with role-based dashboards and Razorpay payment gateway integration.
- Implemented backend functionalities using PHP and MySQL for secure data processing and efficient database management.
- Collaborated with the development team on debugging, testing, UI improvements, and deployment activities.
- Gained practical experience in full-stack development, payment integration, and real-world application workflows.

EDUCATION

Master of Computer Applications (MCA)

2024 – 2026

Parul Institute of Computer Applications

CGPA: 8.4

BCA Cyber Security & Forensics

2021 – 2024

Parul Institute of Computer Applications

CGPA: 7.80

TECHNICAL SKILLS

Security: SIEM (Wazuh, Splunk), Incident Response, Threat Detection, Log Analysis

Networking: TCP/IP, DNS, HTTP/S, IDS/IPS, VPN, Firewalls

Tools: Wireshark, Nmap, Burp Suite, Git, Metasploit (Basics)

Programming: Python, Bash, HTML, JavaScript

Operating Systems: Kali Linux, Ubuntu, Windows

Concepts: MITRE ATT&CK, Cyber Kill Chain, Vulnerability Assessment

Soft Skills: Problem Solving, Communication, Analytical Thinking

CERTIFICATIONS

- CompTIA CySA+
- Data Science Using Python – Swayam
- Introduction to Data Analytics – Simplilearn SkillUP
- HTML, Python, Java & C – IIT Bombay
- Android App Development using Kotlin – IIT Bombay
- Investment Banking Virtual Experience

PROJECTS

SOC Lab using Wazuh

- Built a SOC lab using Wazuh SIEM for real-time monitoring, alert analysis, and threat detection.
- Performed log analysis and investigated suspicious activities using SIEM dashboards.

Network Packet Analyzer

- Developed a packet analyzer to capture and inspect live network traffic.
- Parsed Ethernet, IP, TCP, UDP, and ICMP packets to display protocol information and network statistics.
- Built using Python and raw sockets for network monitoring and analysis.

Simple Port Scanner

- Developed a multithreaded TCP port scanner in Python to identify open ports on target hosts.
- Performed service enumeration and basic network reconnaissance using socket programming.
- Improved scanning performance through concurrent port scanning.

Hash Identifier

- Built a web-based tool to identify cryptographic hash types such as MD5, SHA-1, SHA-256, and SHA-512.
- Used pattern matching and hash length analysis to determine the most probable hashing algorithm.
- Designed a simple interface for quick hash identification during security assessments.

HTTP Header Scanner

- Developed a security scanner to analyze HTTP response headers for common security misconfigurations.
- Checked for missing security headers including CSP, HSTS, X-Frame-Options, and X-Content-Type-Options.
- Generated reports highlighting potential web security improvements.

Password Manager

- Developed a secure password manager for storing and managing user credentials.
- Implemented password encryption and secure storage to protect sensitive information.
- Included features for password generation, search, and credential management.

Keylogger (Educational Project)

- Developed a keyboard event monitoring application for cybersecurity research in a controlled environment.
- Recorded keystroke events locally to understand endpoint monitoring and user activity analysis.
- Explored defensive concepts related to endpoint security and threat detection.

LANGUAGES

English (Fluent) ▪ Hindi (Fluent) ▪ Gujarati (Native)

ACHIEVEMENTS

- Participated in TECH EXPO – Parul University
- Published research on Zero Trust in Cloud Security

EXTRACURRICULAR ACTIVITIES

- Mentored juniors in AI and research activities
- Active participation in E-Sports and competitive gaming
